I spent 50 cents on it, and I have to say, it wasn't even worth that. The game glitches and freezes randomly, you don't actually play anything, you just read dialogue -  
everything is misspelled, you can walk through walls -  
I had no idea what was going on, some choices were mine, others were made for me -

It completely is a garbage game, did they spend an hour making it? Literally anyone could have made a better game than this junk heap, why is this even on Steam???. descent indie rpg game made with rpg maker with an interesting story for a cheap price.. hi guys i got a 90% coupon for this game so i bought it for 20 cents  
the game literally lasts seven minutes  
this is how the story went  
parents die--orphanage-go to party- get girlfriend-become drug dealer- go to prison- lose friends- kill yourself

i just saved you 2 bucks no go buy some csgo skins. Chloe said: you are very cute, i hope i'll see you again sometime \*smack\*  
and game stopped, later game stopped at another moment, this replays many times. The translations were almost unreadable, the story-lines were too short, or very repeatative. I finished all of them in 22 minutes. If they fixed their english, and had more story, it could be good.. indie rpg made with RPG maker telling a serious story - you can easily treat this game as a visual story..

These Blackscreens are fixed now but I don't know how the story continues when you see your girlfriend with a man. There still is some little problems and I would not recommend to buy it for 1.99\u20ac (only in a sale).

The game is not really working yet. It's fun but in 2 out of 3 Times you just get a blackscreen and you are calling the boy 'her'. I will check it out again in a few days to see if something changed because the game just came out at the 25th of Septemeber. I'll just give it a 'Thumbs up' to not change anyone's plans to buy it. It's only 0,49\u20ac so why not.
