
Here's everything to make lo-bap beats like the pros. These are the essential tools to start cooking up your own lo-bap beats. 1. The Spire - This is a spinner controller that makes very accurate rhythms, even if your movement isn't that precise. It's much easier than trying to control a mixer or playing around with decks and loops in FL Studio or Logic Pro 9/10/2015 2. A Microphone - If you're just starting out, I recommend picking up an inexpensive one like this Blue Snowball for around \$40 USD on Amazon 3. A Tuner - If you're going to be doing a lot of recording, you'll need a tuner. Even if you're just going to be practicing before a session, I'll recommend the Audio-Technica AT-LP60 because it's very accurate and will give you accurate feedback when recording. 4. Lo-Bap Beats - The Lo-Bap Beats Bundle from CookinSoul Studios is not only an amazing deal, but it comes with every beat making tool you need to start making your own beats or remixes. If there's two things that people who make lo-bap beats always seem to use again and again, it's their lo-bap beats and their tuners. 5. Lo-Bap Beats Vol 1 - This is the only complete collection of lo-bap beats that we offer and they're all made by CookinSoul and other producers that we work with, so you'll be able to get a good idea of what you're getting by buying this bundle. 6. Lo-Bap Beats Vol 2 - If you liked the first bundle but want to make your own beats without paying for every beat making tool, then this is the pack for you. It comes with 100 different lo-bap beats and it's like getting all of the tools again except now you're not paying over \$100 for them. 7. Lo-Bap Beats Vol 3 - If you're just starting out but have already been making lo-bap beats for a while, then this is the bundle for you. It has all of the tools that Lo-Bap Beats Vol 1 and 2 have as well as some new things that were added over time. 8. Lo-Bap Beats Vol 4 - This is the only complete collection of lo-bap beat samples on CookinSoul.com. It's a collection of all of the different tempos and styles that we make, plus a few extra ones made by other producers specifically designed to work with our lo-bap beats. 9. Lo-Bap Beats Vol 1 Samples - If you know you want all of the beats to make your own lo-bap beats but also want to make your own beats using our stuff, then this is the bundle for you. You can have all of our instrument loops and samples, plus some other beat samples that are used by other producers that are perfect for lo-bap beats. 10. Lo-Bap Beats Vol 2 Samples - If you're just starting out but don't really know what it is or sound like, this bundle will give you a lot of different sounds to choose from so that you'll have plenty of options when trying to come up with your own style. 11.
